Per-protein model wins on the common subset (n=2)
Best per protein by Pearson correlation
Best per protein by mean squared error
Best per protein by cosine similarity
XGBoost: None k2000
ElasticNet: Z-score k2000
XGBoost: Z-score k5000
XGBoost: Z-score k2000
XGBoost: QBin50 k2000
